

# Graves Park – Old Fossils

Tony Spillane  
8<sup>th</sup> July 2019

# Graves Park Fossils

- A fossilised piece of old tree bark has been found, on the south side of the Waterfall Woods.
- A currently decaying tree has been photographed, showing its bark peeling off and falling to the ground.
- A fossilised piece of charcoal has been found in the Summerhouse Woods, and evidence of several charcoal manufacturing pits.
