# Graves Park – Old Hawthorn Hedge Field Boundary

- A very old Hawthorn hedge has been found, that runs along an old field boundary
- The hedge is on a ridge, between an open field and the Cobnar Bank woods
- It runs for approximately 100 metres, forming the top border for field no 484, reaching as far as the start of field no 478 (see 1849 map attached)
- There is evidence of hedge management, with some bushes laid horizontally, with vertical branches running off them.
